

1. Discuss about i) Primary Key ii) Foreign key
2. Difference between logical data independence and physical data independence.
3. Demonstrate concept database languages with examples.
4. Explain various types of each type of data users.
5. Discuss advantages of DBMS over file processing systems.
6. Explain concept data abstraction in detail with examples.
7. Discuss about i) Key attribute ii) Composite attribute iii) Multivalued attributes iv) Derived attributes
8. Draw list and explain different components of database structure.
9. Demonstrate i) Relational model ii) Network model iii) Object based data model.
10. Write note on i) DDL II) DML
11. Write note on i) data abstraction and ii) data modelling
12. Discuss about Data independence and system catalogs.
13. Demonstrate : Conversion of ER diagrams into tables.
14. Discuss about Codd's rules.
15. Sketch ER diagram for Library Management System
16. Discuss about Attributes and Domain.
17. What are the different types of attributes?
18. Demonstrate components of ER diagram
19. Explain with example concept of naming convention
20. Sketch ER diagram for Hospital Management System
21. Sketch ER diagram for Employee Management System
22. Demonstrate keys with suitable examples.
